Fitting Results:

L v R:

```
Beta: [0.51638802 0.46880179]
Beta Std Error: [0.00582631 0.02255099]
Beta Covariance: [[ 0.08018056 -0.31013283]
 [-0.31013283  1.20119401]]
Residual Variance: 0.00042336798450914257
Inverse Condition #: 0.007601853652385769
Reason(s) for Halting:
  Sum of squares convergence
```

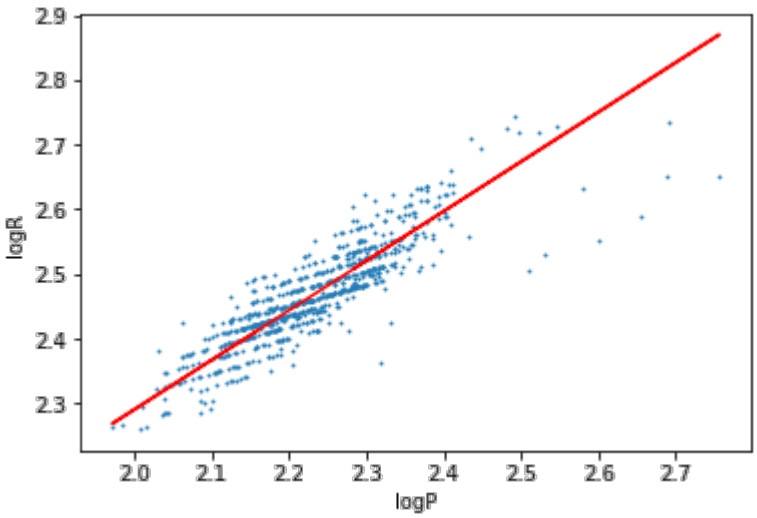

logR = 0.51638892*logL + 0.46880179

P v R:

```
Beta: [0.76664631 0.75677207]
Beta Std Error: [0.01401876 0.03128526]
Beta Covariance: [[ 0.23018045 -0.51323126]
 [-0.51323126  1.14638001]]
Residual Variance: 0.0008537895198923392
Inverse Condition #: 0.013202110004823684
Reason(s) for Halting:
  Sum of squares convergence
```

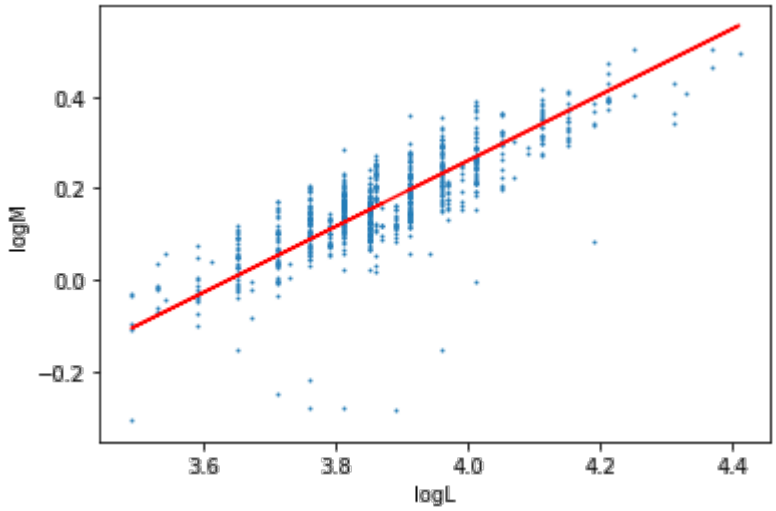

logR = 0.76664631 logP + 0.75677207

L v M:

```
Beta: [ 0.71801325 -2.61143053]
Beta Std Error: [0.0163676  0.06334986]
Beta Covariance: [[ 0.09998504 -0.3867355 ]
 [-0.3867355   1.49780782]]
Residual Variance: 0.002679385252580295
Inverse Condition #: 0.007445510075542
Reason(s) for Halting:
  Sum of squares convergence
```

logM = 0.71801325 logL – 2.61143053

P v. M:

```
Beta: [ 2.13043066 -4.58440491]
Beta Std Error: [0.16269039 0.36283169]
Beta Covariance: [[ 3.14011592 -7.00148813]
 [-7.00148813 15.61824678]]
Residual Variance: 0.008429040370494243
Inverse Condition #: 0.006640517720016478
Reason(s) for Halting:
  Sum of squares convergence
```

logM = 2.13043066 logP – 4.58440491
