Fitting Results:

L v R:

```
Beta: [ 1.8361684  -0.48991907]
Beta Std Error: [0.00757987 0.01659786]
Beta Covariance: [[ 0.27669394 -0.60537274]
 [-0.60537274  1.32672384]]
Residual Variance: 0.00020764602722779873
Inverse Condition #: 0.013054492427372246
Reason(s) for Halting:
  Sum of squares convergence
```

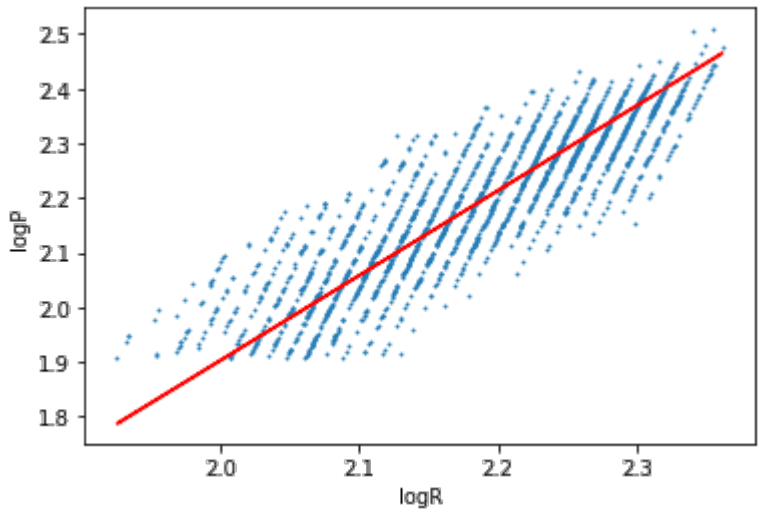

LvRFit = 1.8361684*logRData -0.48991907

P v R:

```
Beta: [ 1.55338848 -1.20398384]
Beta Std Error: [0.01796567 0.0393367 ]
Beta Covariance: [[ 0.23943495 -0.52385458]
 [-0.52385458  1.14788043]]
Residual Variance: 0.0013480286518267218
Inverse Condition #: 0.012393641369760209
Reason(s) for Halting:
  Sum of squares convergence
```

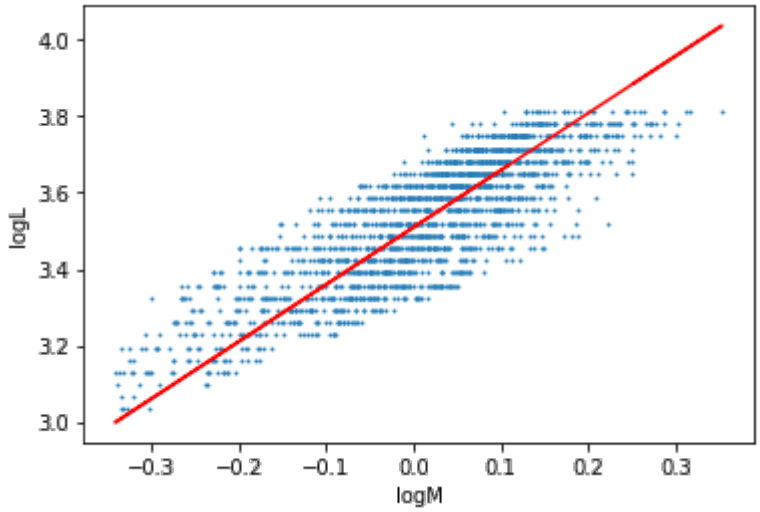

PvRFit = 1.55338848*logRData -1.20398384

L v M:

```
Beta: [1.49718213 3.50915704]
Beta Std Error: [0.02073139 0.00226502]
Beta Covariance: [[ 0.14101349 -0.00171768]
 [-0.00171768  0.00168324]]
Residual Variance: 0.0030478691224173635
Inverse Condition #: 0.11742286373131268
Reason(s) for Halting:
  Sum of squares convergence
```

LvMFit = 1.49718213*logMData + 3.50915704

P v. M:

```
Beta: [1.51918327 2.17613607]
Beta Std Error: [0.05332414 0.00431777]
Beta Covariance: [[ 0.26471855 -0.00322454]
 [-0.00322454  0.00173563]]
Residual Variance: 0.010741460101139758
Inverse Condition #: 0.0848117113940145
Reason(s) for Halting:
  Sum of squares convergence
```

PvMFit = 1.51918327*logMData + 2.17613607
